What is 3-4-50?

Three-four-fifty refers to three behaviors that contribute to four chronic diseases and result in 50% or more deaths worldwide. These chronic diseases are potentially preventable through modifying diet, physical activity, and smoking behaviors. In San Diego County 50% of all deaths are due to these four chronic diseases.

3-4-50 in San Diego County—Central Region

- From 2000 to 2019, the overall percent of all deaths due to chronic disease decreased in the Central Region and its Subregional Areas (SRAs) as well as the number of all cause deaths (Figure 1).
- Overall, chronic disease death rates have decreased in the Central Region and its SRAs from 2000 to 2019 with the exception of the Southeastern San Diego SRA which increased by 12.7% (Figure 2).
- Among the Central Region SRAs, Southeastern San Diego had the highest percentage of deaths due to chronic disease in 2019.
- Among the Central Region SRAs, Southeastern San Diego had the highest chronic disease death rate in 2019.
- Despite a decrease, chronic diseases still account for 51% of all deaths in the Central Region.
